SAKÉ

There is much myth and mystery around its origins however Saké has a rich history in Japan spanning over 2000 years, and with around 1,500 breweries existing today.

Like wine, there are categories of Saké. Instead of breaking out in terms of different varieties of grapes such as Chardonnay or Cabernet, Saké is broken down in terms of how much each grain of Saké brewing rice is milled. Thus, categories of Saké are established by polishing/milling percentages irrespective of the rice varietal.

Even though there are roughly 70 different Saké brewing rice types, think in terms of how much each grain of rice is removed from the outside husk in the attempt to get at the starchy core inside of each grain of the brewing rice.

SHOCHU

A Japanese traditional hard liquor, similar to brandy and vodka distilled spirits, made from grains and vegetables. The most common base ingredients are sweet potato, barley, rice, buckwheat and sugar cane. Because each of these base ingredients brings its own unique flavour to the final product, Shochu comes in a wide variety of flavours and overtones. This variety in flavour is behind much of the popularity of Shochu in Japan.

UMESHU & JAPANESE LIQUEURS

Umeshu is a traditional type of Japanese liqueur made from ume plums steeped in sugar and alcohol. It has become a popular alcoholic beverage due to its sweet aroma, sour plum flavours, and relatively low alcoholic content that makes it easy to drink.
